

Cable Entry Systems

Up to 80% less install time

Simplified installation dramatically increases productivity and frees up installers for other activities.

Up to 80% less space required

High-density hole configurations are critical for machine applications that require several cables with limited space

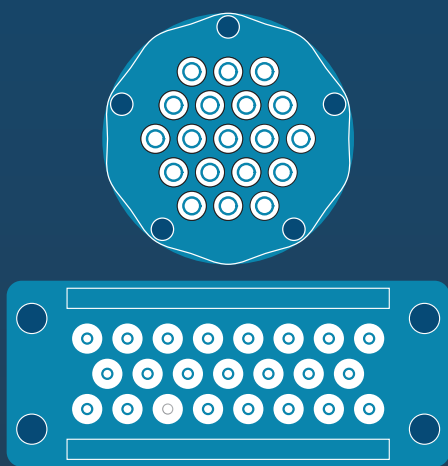

Manages terminated AND unterminated cables

Prevents re-termination of cables in order to pass through openings

IP ratings

Meets multiple IP/NEMA ingress sealing ratings to accommodate a variety of applications

Round AND rectangular solutions

Round and rectangular designs are compatible with industry standard electrical cutout punches to ease installation

Accommodating cable range from .06" up to 1.18"

Compatibility with a wide variety of cable sizes allows for more
