

technical information

Dielectric Double Jacketed Fiber Cable is an integral part of the Panduit end-to-end fiber optic solution, designed to support today's data needs while meeting tomorrow's ever-advancing network requirements. Kevlar re-enforced double jacketing eliminates the need for additional conduit or pathway installation and provides a smaller crush resistant pathway for improved design flexibility and lower installed cost. All-dielectric construction eliminates the need for grounding and bonding, thereby reducing installation time and cost. All Dielectric Double Jacketed Fiber (DDJ) are Riser rated (OFNR) and compliant with Low Smoke Zero Halogen (LSZH) specifications. Fiber types include OM4 multimode, and OS2 singlemode. Available in 6, 12, and 24 fiber counts.

application

Designed for use in horizontal installations and backbones within buildings to provide high-density connectivity and ease of installation. Rugged, durable, with crush resistance greater than unarmored cable, the need to route through conduit is eliminated.
