Real-World Solutions
With a proven reputation for resilience and innovation, Panduit and its partners work with you to overcome challenges and implement highly-valued solutions that create a competitive business advantage. Panduit offers the broadest range of solutions from data centers and intelligent buildings to manufacturing operations, to help you build a smarter, unified business foundation.

Technology Leadership
Panduit develops innovative physical infrastructure solutions that meet the rapidly changing needs of our clients, from firmware and software to advisory services. This commitment to supported investment in advanced research, solutions-focused product development, world-class manufacturing, and collaboration with customers at the forefront of technology.

Partner Ecosystem
Our best-in-class partner ecosystem offers a comprehensive portfolio of services that shape the project lifecycle, from planning and design to delivery, deployment, maintenance, and operation. Panduit business partners — distributors, and certified architects, consultants, engineers, designers, system integrators, and contractors — are qualified to help you achieve your objectives and realize predictable and measurable results.

Strategic Alliances
Panduit cultivates long-term strategic alliances with industry leaders, including Cisco Systems, EMC, Intel, and BlackBerry. Panduit’s approach to distribution, and executory business, products, solutions, and services that drive efficiencies help solve our customers’ greatest business challenges.

Global Business Commitment
Panduit is committed to delivering a consistently high level of quality and service the world over. With a presence in more than 100 countries, local Panduit sales representatives and technical specialists, offer guidance and support that bring value to your business. Our global supply chain, which includes manufacturing, customer service, logistics, and distribution partners, enables prompt response to your inquiries and timely delivery to any worldwide destination.

Sustainability
With a committment to environmental sustainability, Panduit develops and implements solutions that protect, preserve, and restore the world in which we live. This commitment is characterized by Panduit’s CEO, Bob Conlin. World Headquarters, leveraging the well-defined Physical Infrastructure approach to enable convergence of critical building systems to drive energy efficiency and ongoing operational improvement.
Delivering a Scalable, Consolidated Facility that Increases Productivity and Enhances Growth

Panduit enables JLT India to build a robust, new facility based on a unified physical infrastructure that accommodates its growing business requirements.

Business Challenges

To accommodate its continuous growth, address the steady rise of operational expenses (OpEx), and provide the best-in-class working environment for its employees, JLT India decided to build a new multi-story facility that would consider all three offices.

With the three separate offices, JLT India was experiencing challenges with optimizing primary resources in the areas of human resources, infrastructure, and budget. The company was also sustaining increasing OpEx, which it needed to control.

JLT India required a robust, highly reliable, end-to-end solution with proven offerings and reliability of mission-critical systems within the JLT India facility.

Business Benefits

A secure physical infrastructure that can grow with the company needs could provide opportunities for new business applications to upgrades as they occurred. “We felt Panduit could provide us with the best-in-class solution that would allow us to meet the rapidly evolving needs of our customers.”

Panduit Solution

Located in Powai, Mumbai, the new 123,000 square foot office would hold 1500 employees, consolidating the existing offices into one location to increase manageability and productivity of existing nanoview, and control costs while maintaining business agility.

It was a priority to JLT India for the new building to be completed within a tight timeframe of 80 days. The company places its clients first, and needed the new state-of-the-art facility to quickly accommodate all Marshall based teams throughout the consolidation process.

JLT India required a robust, highly reliable, end-to-end solution with proven offerings and needed a solutions provider who could accommodate its desire to fulfill customer expectations within a scalable facility while accommodating the strict timeframe for completion.

“We needed to upgrade our facility to provide an optimal atmosphere for employees to collaborate freely, enhancing productivity. We also wanted the ability to quickly add new business applications to upgrades as they occurred.”

Panduit Enterprise Solution

Along with the Panduit solution, selected partners for this project were Cutech as the selected partner for structured cabling, and a variety of other companies that provided the best-in-class solution that would allow JLT India’s growth and increased manageability.

Panduit Enterprise Solutions provide the industry’s most comprehensive and holistic portfolio of products and services to build an intelligent physical infrastructure and allowed JLT India’s quick scale-up to accommodate additional users and technologies. This solution aligned with JLT India’s overall vision to maintain operational and energy efficiencies, cost effectiveness, and helped ensure optimum performance.

“We felt Panduit could provide us with the best-in-class solution that would allow us to meet the rapidly evolving needs of our customers.”

Panduit Fiber Optic Systems deliver high performance, reliability and scalability to meet JLT India’s specific cabling requirements. These systems feature low loss, high performance connectivity for added flexibility, performance and scalability, ensuring lower total cost of ownership and greater return on investment. OM5 Fiber and JustOpt™ and OptiCore™ Tight Buffer and Aisotechnology were installed to deliver consistent performance and reliability of mission-critical systems within the JLT India facility.

The Panduit Network Identification Solution was implemented to ensure that JLT India can quickly and accurately identify system components and connections.

Along with the Panduit solution, selected partners for this project were Cutech as the consultant and Aria Designs as the architect. Hamilton Systems (P) Ltd served as the systems integrator and contractor and Delkon Networks (P) Ltd was the distributor.

JLT India chose the Panduit Structured Cabling System, specifically the TX6™ PLUS UTP Copper Cabling System which has reduced attenuation, guaranteed channel performance above the standards, and a tested beyond industry standards. JLT India also chose the Panduit Fiber Optic System because it provides exceptional cable performance, ensures proper performance and quick installation. Interoperable and backward compatible, this end-to-end system offers design flexibility to protect JLT India’s network investments well into the future.

“We felt Panduit could provide us with the best-in-class solution that would allow us to meet the rapidly evolving needs of our customers.”

To improve cable management, JLT India chose Panduit’s NetRunner™ High Capacity Vertical Cable Manages which organize, manage, protect and increase network cabling while ensuring system performance and reliability within the JLT India facility. The NetRunner™ High Capacity Vertical Cable Managers also minimize risks to system performance in data centers and telecommunication rooms.

The Panduit Fiber Optic Systems deliver high performance, reliability and scalability to meet JLT India’s specific cabling requirements. These systems feature low loss, high performance connectivity for added flexibility, performance and scalability, ensuring lower total cost of ownership and greater return on investment. OM5 Fiber and OptiCore™ and OptiCore™ Tight Buffer and Aisotechnology were installed to deliver consistent performance and reliability of mission-critical systems within the JLT India facility.

The Panduit Network Identification Solution was implemented to ensure that JLT India can quickly and accurately identify system components and connections.
JLT was built on a foundation that balances the interests of its clients, shareholders, employees, and partners in the markets in which it trades. The company’s goal is to improve the way it serves clients by investing in the efficiency and effectiveness of its people, systems and processes. “We strive to provide a distinctive and entrepreneurial work environment and to operate as one firm, bringing the best of JLT India to our clients and trading partners anywhere in the world.”

The primary objective of this project was to consolidate the three existing offices into one facility that would house all of its business operations. JLT India wanted to combine its facilities to increase productivity of existing resources and increase manageability.

JLT India also wanted to use this consolidation as an opportunity to harness synergies, knowledge and creativity among its employees, providing a distinct and entrepreneurial work environment that would allow employees to collaborate to ensure that all parts of the company work together to deliver client solutions. An upgraded cabling infrastructure would support the need to transmit information as quickly as possible to allow for a seamless transition that would not interrupt service to its clients.

In addition, the new facility would allow JLT India to utilize technology infrastructure be deployed as quickly as possible to allow for a distinctive and entrepreneurial work environment and to operate as one firm, bringing the best of JLT India to our clients and trading partners anywhere in the world.

Technology Leadership
Panduit develops innovative physical infrastructure solutions that meet the rapidly changing needs of our clients, from hardware and software to advisory services. This commitment is supported by investment in advanced research, solutions-focused product development, world-class manufacturing, and collaboration with customers at the forefront of technology.

Partner Ecosystem
Our best-in-class partner ecosystem offers a comprehensive portfolio of services that span the project lifecycle, from planning and design to delivery, deployment, maintenance, and operation. Panduit partners are distributors, and, in some cases, system integrators. Partners work with you to help achieve your objectives and maximize predictable and measurable results.

Strategic Alliances
Panduit cultivates long-term strategic alliances with industry leaders, including Cisco Systems, EMC, IBM, and Rockwell Automation, to develop, optimize, and validate solutions for our customers. This investment in people and resources helps solve our customers’ greatest business challenges.

Global Business Commitment
Panduit is committed to delivering a consistently high level of quality and service the world over. With a presence in more than 100 countries, local Panduit sales representatives and technical specialists offer guidance and support that bring value to your business. Our global supply chain, which includes manufacturing, customer service, logistics, and distribution partners, provides prompt response to your inquiries and delivers to any worldwide destination.

Sustainability
With a commitment to environmental sustainability, Panduit develops and implements solutions that protect, preserve, and restore the world in which we live. This commitment is characterized by Panduit’s Q3 Certified Green Certified World Headquarters, leveraging the In-Sight Physical Infrastructure® approach to enable convergence of building systems to drive energy efficiency and ongoing operational improvement.

Case Study
Jardine Lloyd Thompson (JLT) India
Jardine Lloyd Thompson (JLT) India is a wholly owned subsidiary of Jardine Lloyd Thompson Group, one of the world's leading global businesses in the provision of insurance and financial services. Jardine Lloyd Thompson Group is headquartered in London, with regional headquarters in Singapore, Hong Kong and Mumbai. Jardine Lloyd Thompson Group manages investments and provides insurance and financial services through operating companies and joint ventures around the world. Jardine Lloyd Thompson Group is listed on the London Stock Exchange and is a constituent of the FTSE 100 Index.

Jardine Lloyd Thompson (JLT) India is the Jardine Lloyd Thompson Group’s largest enterprise, with 1,085 employees and substantial operations throughout India. Jardine Lloyd Thompson (JLT) India provides a number of services in the following areas:

· Finance
· Consulting and transaction processing
· Information Technology (application development, maintenance, and support)
· Marketing
· Operations
· Project Management
· Legal

Since its inception, JLT India has grown significantly, becoming the second largest office, after the Singapore office, in the world’s largest Lloyd’s of London broker.

In 2007, offering access to local talent and expertise in India’s growing insurance market, Jardine Lloyd Thompson (JLT) India was established as the Global Shared Services Center for the JLT Group (India). Today, JLT India is the Jardine Lloyd Thompson Group’s largest enterprise, with 1,085 employees and substantial operations throughout India. Delivering a Scalable, Consolidated Facility that Increases Productivity and Enhances Growth

Panduit enables JLT India to build a robust, new facility based on a unified physical infrastructure that accommodates its growing business requirements.

Business Challenges

To accommodate its continuous growth, address the steady rise of operational expenses (OpEx), and provide the best-in-class working environment for its employees, JLT India decided to build a new multi-story facility that would consider these existing offices.

With the three separate offices, JLT India was experiencing challenges with optimizing primary resources in the areas of human resources, infrastructure, and budgets. The company was also sustaining increasing OpEx, which it needed to control.

Located in Powai, Mumbai, the new 2,000 square foot office would hold 1,500 employees, consolidating the existing offices into one location to increase manageability and productivity of existing manpower, and control costs while maintaining business agility.

It was a priority to JLT India for the new building to be completed within a tight timeframe of 80 days. The company places its clients first, and needed the new building to be completed within the timeframe to allow the design team to employ new intelligent infrastructure design strategies that enabled the design team to employ new intelligent infrastructure design strategies that reduced OpEx and provided a flexible migration path for future growth. The building was engineered to help teams collaborate more productively, and reflect the global technology solutions and global brand the company has worked hard to achieve.

The secure physical infrastructure allows JLT India to respond to customer demands easier and quicker, which increases productivity, and optimizes available resources. Panduit delivered the project on time, which allowed JLT India to continue its business operations seamlessly. With the Panduit Enterprise Solution, JLT India has also been able to optimize its key resources while maintaining business agility and customer confidence.

Business Benefits

A secure physical infrastructure that can grow with the company needs while delivering business agility is a key to the rapidly evolving needs of our customers. “We felt Panduit could provide us with the best-in-class solution that would allow us to meet the rapidly evolving needs of our customers.”

Panduit Unified Physical Infrastructure® Approach

The Panduit Unified Physical Infrastructure® (UPI) approach integrates critical systems – communication, computing, power, control, and security – into a single, easy-to-manage network infrastructure. This approach allows organizations such as JLT India to increase productivity, reduce operational expenses (OpEx), and enhance customer satisfaction. “Panduit enabled us to meet JLT India’s overall vision to maximize operational and energy efficiencies, cost effectiveness, and helped ensure optimum performance.”

Panduit Solution

JLT India chose the Panduit Structured Cabling System, specifically the TAW™ PLUS™ Copper Cabling System which has removed rework, guaranteed channel performance above the standards, and is tested beyond industry standards. JLT India also chose the Copper system because it provides exceptional cable performance, ensures proper performance and quick installation. Interoperable and backward compatible, this end-to-end system offers design flexibility to protect JLT India’s network investments well into the future. “We felt Panduit could provide us with the best-in-class solution that would allow us to meet the rapidly evolving needs of our customers.”

To improve cable management, JLT India chose Panduit Nexell™ High Capacity Vertical Cable Managers which organize, manage, protect and increase network cabling while ensuring system performance and reliability within the JLT India facility. The Nexell™ High Capacity Vertical Cable Managers also minimize links to system performance in data centers and telecommunication rooms.

Panduit Fiber Optic Systems deliver high performance, reliability, and scalability to meet JLT India’s specific cabling requirements. These systems feature low loss, high performance connectivity for added flexibility, performance and scalability, ensuring lower total cost of ownership and greater return on investment. OM3 Fiber and Opti-Cam® and Opti-Cam® PLUS•CO™ fiber terminators and Adapters were used to deliver consistent performance and reliability of mission-critical systems within the JLT India facility.

The Panduit Network Identification Solution was implemented to ensure that JLT India can quickly and accurately identify system components and connections.

Unified Physical Infrastructure

Business Benefits

The Panduit Enterprise Solution provided a flexible, end-to-end solution customized to JLT India’s performance and operational requirements. The multi-task facility built on UPI principles, to support key initiatives such as sustainable operations, scalable growth and increased manageability.

Panduit Enterprise Solutions provide the industry’s most comprehensive and holistic portfolio of products and services to build an intelligent physical infrastructure and allowed JLT India’s quality staff to accommodate additional needs and technologies. This solution aligned with JLT India’s overall vision to maintain operational and energy efficiencies, cost effectiveness, and help ensure optimum performance.

Panduit delivers a unified physical infrastructure that can quickly and accurately identify system components and connections. Along with the Panduit solution, selected partners for this project were Cubix as the consultant and Adaptec Designs as the architect. Net11 Systems (P) Ltd served as the systems integrator and contractor and Online Netsys (P) Ltd was the distributor.
Panduit® NetRunner™ High Capacity Vertical Cable Managers also minimize risks to system cabling while ensuring system performance and reliability within the JLT India facility. The secure physical infrastructure allows JLT India to respond to customer demands easier and quicker, which increases productivity and optimizes available resources. Panduit delivered the project on time, which allowed JLT India to continue its business operations seamlessly. With the Panduit Enterprise Solution, JLT India has been able to optimize its key resources while maintaining business agility and customer confidence.

"The upgraded cabling infrastructure has allowed our employees to work more effectively, providing more unified results and an increase in customer satisfaction. We have also been able to increase capacity management for greater real estate utilization."

Business Benefits
The Panduit Enterprise Solutions provide a flexible, end-to-end solution customized to bring JLT India’s performance and operations requirements. The new multi-story facility allowed the design team to employ new intelligent infrastructure design strategies that reduced OpEx and provided a flexible migration path for future growth. The building was engineered to help teams collaborate more productively, and reflects the global technology solutions and global brand the company has worked hard to achieve.
