

Panel Building Labeling Made Easy

What label do I use to identify an 18 AWG wire?

How do I create an ANSI compliant safety sign?

How do I quickly create a terminal block marker with the legends aligned with the termination points?

Answer these questions and save up to 75% of your time using innovative labeling software made just for you.

- **EASY-MARK™** Labeling Software Version 3.0 simplifies label creation for wires/cables, terminal blocks, safety signs, voltage marking and more
- Intuitive wizard interview process allows automatic generation of ANSI compliant legends on your labels and signs
- Software selects and formats the optimum label for your specific applications

EASY-MARK™ 3.0 includes WYSIWYG user interface, alpha/numeric serialization, data import, symbol import and is part of a complete line of innovative identification solutions from *PANDUIT*.

See for yourself how EASY it is to use! For a complementary software demonstration or video download, visit:
