CONTOUR CRIMP™

PAN-TERM® Terminals, Ferrules, and Crimping Tools combine to deliver the highest quality terminations at the lowest installed cost.

PANDUIT termination solutions increase productivity and minimize repetitive stress injuries, providing consistent terminations with maximum reliability.

NEW! Battery Powered Hydraulic, 4 Ton, Crimping Tool CT-2600

- Delivers rapid terminations for large wire applications, with a 4-second crimping cycle, for job-site flexibility and enhanced productivity
- Compact and lightweight 3.8 lbs. design allows one-hand crimp capability for improved efficiency
- Rotating 360° crimp head feature allows access in confined areas and allows for termination of all PANDUIT #8 – 2 AWG large wire ring terminals

Battery Powered, 2 Ton, Crimping Tool CT-2500

- Quick 2-second crimping cycle results in less time to crimp terminals compared to conventional methods
- Lightweight 3.3 lbs. design provides maximum productivity and ease of use in continuous workflow operations
- Interchangeable crimp heads for termination of all PANDUIT #22 – 10 AWG terminals, disconnects, and splices

CONTOUR CRIMP™ Controlled Cycle Crimping Tools

- Ergonomic, controlled cycle design provides a consistent low effort crimp of terminals or ferrules each and every time
- Multi-position locator ensures proper location of terminal in crimp pocket every time for consistent, reliable terminations
