Overview of Products                                                                                       Page 2
Wall Mounting                                                                                              Page 2
Safety Information and Warnings                                                                            Page 2
Reversible Door                                                                                             Page 3
Removable Gland Plate                                                                                       Page 3
Pre-Configured Layout                                                                                       Page 4
Recommended Installation Instructions for:

  Power Entry                                                                                                        Page 4
  Uplink Entry                                                                                                       Page 5
  Downlink Entry                                                                                                      Page 5
Integrated Network Zone System configurations include an enclosure with required connectivity and cable management, internal factory-connected wiring and includes partner equipment as-specified on the Field Wiring Diagram supplied inside each unit.

Additional partner equipment may include one or more of the following DIN-Rail mountable items:
- Industrial automation switch
- Grounding Wire
- Mini-Com DIN Rail Mount Adapters

⚠️ Be sure wall is capable of supporting cabinet and equipment.

DISCLAIMER OF WARRANTIES AND LIMITATION OF LIABILITIES
The practices contained herein are designed as a guide for use by persons having technical skill at their own discretion and risk. Panduit does not guarantee any favorable results or assume any liability in connection with these instructions. Local, State, Federal, and Industry Codes and Regulations, as well as manufacturers requirements, must be consulted before proceeding with any project. Panduit Corp. makes no representations of nor assumes any responsibility for the accuracy or completeness set forth herein. Panduit disclaims any liability arising from any information contained herein or for the absence of same.

Wall Mounting
Enclosure may be mounted on any wall utilizing Unistrut or by drilling directly into any concrete wall. There are two mounting hole locations on the top flange and two locations at the bottom flange.

Step 1:
Drill holes 7.25"-10" apart horizontally and 16" apart vertically.

Step 2:
Mount the enclosure with the locks to the right and secure.
Reversible Door
The enclosure comes with the door opening to the left. The door may be reversed to open to the right.

**Step 1:** Remove screws and washers from door hinges.
**Step 2:** Turn door 180 degrees and mount to opposite side of enclosure using same screws and washers.

Removable Gland Plate
The Gland Plate, located on the top and bottom of the enclosure, is removable for machining to accept bulkhead connectors or compression fittings.

To remove gland plate, unfasten the (10) nuts, (10) split-ring washers, and (10) flat washers attached to the threaded studs of the gland plate and remove plate from the enclosure. When reinstalling the gland plate, ensure the nuts are tightened until the gland plate flanges make contact with the enclosure surface.
Recommended Installation Instructions for Bundled Accessories

Integrated Network Zone

- DIN Rail
- DIN rail mounted Mini-Com adapters (2)
- Fiber patch cord slack spool
- Stratix 5700 Industrial Switch
- Cable management L-rings mounted to the side accessory panel
- Ground Wire

Power Entry

- Run incoming 24 VDC power through conduit installed on top or bottom gland plate. Install power wiring according to the field wiring diagram. (Conduit or cord grips provided by customer)
Uplink Cabling

Uplink cable entry

DIN rail mounted Mini-Com adapters (2)

Fiber patch cord slack on the side mounted spool

Downlink Cabling

Downlink cable entry

Slack loop formed around the L-ring cable managers
