

TO DOWNLOAD NEWEST VERSION OF PANMARK FROM WEBSITE

1. Go to www.panduit.com
2. Under Product Information, click on Downloads.
3. This will open a Downloads page, select “Pan-Mark Labeling Software for Windows”
4. You will have to register and click Submit.
5. Click on “English (US) Upgrade File Rev. Date 09/16/04 ”.
6. Click “Save”.
7. This should open the “Save As” and you should save it on your Desktop. (083433.zip is the file name) **Do not change the file name; just make sure to save it to the desktop.**
8. It will be saved on the desktop as a Winzip file. You need to have WinZip 8.0 or higher, if WinZip is not on your computer or if you have an older version of WinZip, there is an icon (WinZip in Blue) in the Downloads screen that will take you to www.winzip.com. You will use the Evaluation version of WinZip.
Downloading the latest version of WinZip Evaluation Version
 - a. On the WinZip website, you will click the RED download button.
 - b. On the next page, click the RED Download Evaluation button.
 - c. On the next page, choose select #2 “from WinZip Computing, Inc.”, then click on the RED Download WinZip 9.0 SR-1 Now button.
 - d. This will take you to the “While you are downloading” screen and you should get a File Download screen popup. Click Open.
 - e. Once the download is complete, click Setup and this will start the download.
 - f. Click Okay at the WinZip Setup screen and it will start installing.
 - g. You will click Next, Yes to agree to the License Agreement, and then Next throughout the setup, making sure to select “Start with WinZip Classic” and “Express Setup” on the appropriate screens.
 - h. Click Finish and you can close any file that WinZip has opened.
9. Double click the 083433.zip file to open it in Winzip.
10. You will want to use the Evaluation version. You should get to a screen with a list of files.
11. Double click on the Setup.exe folder from the list of file names.
12. This will start downloading PanMark to your computer.
13. Follow through all the process by choosing the options that are already there.
14. PanMark should be installed on your computer.
