

ES2P PDU

Meet evolving demands with ES2P PDUs. Built to support growing infrastructure with balanced performance, reliability, and essential capability.

Scale As You Grow

- Daisy chain up to 16 PDUs
- Simplified deployment
- Easier IP address management as environments expand

Hot Swappable Gigabit

- Hot-swappable controller and display
- Rack power remains during maintenance or upgrades
- Gigabit networking for modern data center switches

Hardened Security

- SNMPv3, TLS, and encryption
- Industry security scans and validation
- Fortify WebInspect and Tenable Nessus assessments

Resilient Design

- Reliable operation at full load
- Rated for up to 55°C ambient temperatures

5-Year Warranty

- Built using Panduit quality methodology
- 3-year standard + 2-year once registered

Various Form Factors

- 0U and 1U configurations
- Supports different rack layouts
- Flexible power and deployment options

Industry-driven power for critical environments
