TX6A 10Gig, TX6 PLUS and TX5e UTP Jack Modules with Right Angle Wire Cap

Part Numbers: CJR6X88TG**, CJR688TG**, CJR5E88TG**

IMPORTANT!: Determine the desired direction of cable before wiring the cap. The cap, in relation to the jack, must be kept consistent throughout the entire termination.

Understanding the Label

1. Do not pre-arrange conductors.

2a. Bend wires to ease inserting them into the cap.

2b. (OR) Bend wires to ease inserting them into the cap.

3a. Do not pre-arrange conductors.

3b. Do not pre-arrange conductors.

4a. Bend wires to ease inserting them into the cap.

4b. (OR) Bend wires to ease inserting them into the cap.

5a. (OR)

**INSTALLATION INSTRUCTIONS**

**Notes:**

1. For specified performance, follow TIA/EIA 568-C installation guidelines.
2. Jack Modules can terminate 22-26 AWG solid or stranded IWC data cable with 0.062” (1.57mm) maximum insulated conductor outside diameter.
3. Jack Modules may be re-terminated a minimum of 20 times.
4. For technical and performance information, consult Panduit Technical Support.

As with all Wiring Accessories, the following statements apply:

1. Never install communications wiring during a lightning storm.
2. Never install communications wiring in wet locations unless the jack is specifically designed for use in wet locations.
3. Never touch uninsulated communications wiring or terminals unless the communication line has been disconnected at the network interface.
4. Use caution when installing or modifying communication wiring.

---

**REMOVAL STEPS**

1. Remove the jack from the wall.
2. Lift the jack from the wall.
3. Use caution when removing the jack from the wall.

---

**Important!** Maintain orientation of cap in relation to jack from previous steps.
