IndustrialNet[™] DIN Rail Mount Fiber Patching Solution

specifications

The Fiber DIN Mount Patch Panel is a robust fiber containment solution that shall be made of high impact polycarbonate material and shall mount to a standard 35mm DIN rail. The product consist of a fiber patch enclosure with a fiber adapter opening and will be primarily deployed in conjunction with Industrial Ethernet modular switches in fiber-to-enclosure applications, supporting Industrial Ethernet. The product shall include adjustable latches to lock it in place when mounted on the DIN rail. Latch design shall also allow product to mount on a flat surface for vertical bulkhead mounting. The extended depth panel is designed to accept fiber cassette. Standard and extended designated space for slack management and provide enclosed fiber protection.

technical information

Standards:	Norme International Standard CEI IEC 60715; DIN EN 60715; DIN EN 50022; DIN 46277-3; BS 5584:1978:, IEC 60068 Environmental Testing; cULus
Dimensions:	FDPPSIG: 4.76"D (121mm) × 2.95"W (75mm) × 5.92"H (150mm) FDPPEIG: 6.93"D (176mm) × 2.95"W (75mm) × 5.92"H (150mm)
Material:	UL94V-0 engineering thermoplastic
RoHS compliance:	Compliant
Mounting options:	Mounts to a standard 35mm DIN rail; can also mount to other surfaces using mounting holes in latches
Packaging:	Fiber enclosure includes PG21 cable entry gland which includes two inserts for use with a range of fiber cables and $6-32 \times 3/8$ " Phillips head screws to mount faceplate to patch panel
Temperature:	Temperature range of -10°C to 60°C (14°F – 140°F) complies to UL 508 Panel standard and operating range of the ethernet switches

key features and benefits

DIN rail mount:	Employs dual purpose, snap-in mounting latches which have an audible click to indicate the latch is in the correct position. The latches serve to hold the unit on the DIN rail while allowing it to slide side to side. Latches also serve as wall mounting brackets via an external mounting hole in the latch.
Modular:	Standard depth accepts most FAPs
	Extended depth accepts most FAPs or cassettes
Patching:	Easy and logical port mapping to common Ethernet mini-switch ports enables convenient MACs (moves, adds, and changes) in industrial telecommunications zone enclosure or control panel applications. IndustrialNet DIN Rail Mount Patching Solution provides a testable permanent link for link commissioning and troubleshooting and provides flexibility and scalability for future growth

applications

IndustrialNet DIN Rail Mount Fiber Patching Solution conserves precious real estate by consolidating all fiber patching onto the DIN rails of a zone enclosure or control panel, designed to support FAPs and most fiber cassettes. This product can be deployed as flexible, reconfigurable and high performance structured cabling elements in traditional hierarchical star, fiber-to-enclosure (zone), or device level ring Industrial Ethernet architectures. This structured cabling solution is important as Ethernet reaches further into the industrial automation network, enabling traditional IT departments to manage change in the industrial network through the use of familiar patching facilities and structured cabling models. The IndustrialNet Modular Patching allows customers to easily deploy fiber connectivity in the same modular DIN footprint in such applications.
