HD Flex™ Fiber Enclosures

**specifications**

The HD Flex enclosure shall house, organize, manage and protect fiber optic trunk cables, terminations, splices, connectors and patch cords as well as accommodate all HD Flex cassettes and fiber adapter panels (FAP). The HD Flex Enclosures provide front access with drawers that slide out into two locked positions, regardless of how many enclosures are stacked together. The Enclosure trays have a unique split tray feature that allows for half of the tray to operate independently, which is an ideal option for maintainability as well as redundant networks.

The Enclosures allow cassettes and FAPs to be installed by dropping them into the front of the enclosure tray or sliding them into the rear of the enclosure tray. This allows each individual cassette or FAP to be removed with minimal disruption to other cassettes or FAPs.

The Enclosures are constructed of steel material and can be ordered in either 4-port, 6-port or 12-port configurations that accept combinations of either 4-port, 6-port cassettes and 12-port cassettes respectively.

**technical information**

- **Mounting:** Integral mounting flange for installation in 19" wide EIA-310 racks
- **Material:** Steel and plastic

**key features and benefits**

- **Modular design accepts up to 12 HD Flex Fiber Cassettes or Fiber Adapter Panels per rack unit:** Provides higher patch field density in fewer rack units saving valuable rack space
- **Compatible with all HD Flex Fiber Cassettes and Fiber Adapter Panels:** Provides versatility and flexibility with a fully modular solution for a variety of pre-terminated installations
- **Rack/Cabinet Rail Mounting Cable Management Bracket:** Provides template for additional mounting of cables, moving cable from back of enclosure to side of enclosure resulting in easy access to connections for improved serviceability
- **Front and Rear Accessible Enclosure Tray:** Allows access to connections from front or rear of rack/cabinet facilitating easy moves, adds and changes without disruption of network connections
- **Front Drop In and Rear Slide Out Mounting of Cassettes and Fiber Adapter Panels:** Allows access to cassettes without fully sliding out cable management plate
- **Split Enclosure Tray:** Allows each half of tray to operate independently providing improved reliability and serviceability of redundant network connections
- **Multi-positional Enclosure Tray:** Allows tray to be locked in two extended positions resulting in improved access when patching and maintaining network connections
- **Convertible between 4-port, 6-port and 12-port Cassettes and Fiber Adapter Panels:** Accommodates current and future optical connectivity options, duplex, and parallel fiber

**applications**

HD Flex Fiber Optic Enclosures provide a system for managing fiber terminations, connections, and patching in all types of applications. The enclosures are a component of the HD Flex Fiber Cabling System. They are ideal for fast, flexible and reliable patch field solutions within main, horizontal and/or equipment distribution areas (MDA, HDA and EDA).
