

High-Density 10 Gigabit Performance

OPTICOM® QUICKNET™ Fiber Optic Cabling System delivers optimum performance, scalability and reliability for high-density network applications.

- Exceeds 10 Gigabit Ethernet standards and 100% tested to deliver verified optical performance and reliability for improved network integrity
- Modular pre-terminated components provide a scalable solution for the lowest total cost of ownership
- Enables quick, plug-in network deployment of up to 96 fiber connections in a single rack space with superior cable access and management capabilities
- Modular **OPTICOM® QUICKNET™** Pre-Terminated MTP* Cassettes feature high-density MTP* connectors and small form factor LC or SC connectivity
- 12-fiber **OPTICOM® QUICKNET™** MTP* Interconnect Patch Cords connect cassettes for scalability and quick connection of data center or LAN segments
- Innovative **OPTICOM® QUICKNET™** Rack Mount Fiber Enclosures feature a slide-out, tilt-down drawer to enable improved installation, service and inspection
