QuickNet™ SFQ Series
MTP* Fiber Optic Cassettes

**Technical Information**

QuickNet™ SFQ Series MTP* Fiber Optic Cassettes comply with all multimode and singlemode channel performance requirements. Fiber optic cassettes support network data rates of 10 Gb/s for link lengths up to 300 meters using laser optimized OM3 fiber and link lengths up to 550 meters using OM4 fiber. Optimized cassettes provide insertion loss of 0.5dB max., and standard cassettes provide 0.75dB max. to meet IEEE 802.3ae max. channel loss specification. QuickNet™ SFQ Series MTP* Fiber Optic Cassettes employ high performance MTP* connectors on the rear of the units routed to 6 or 4 duplex LC colors shall follow TIA/EIA-568-C.3 suggested color identification scheme. They interconnect with high-density SFF MTP* interconnect cable assemblies. High-density cassette patch panels hold up to 8 cassettes, allowing up to 96 fiber connections to be deployed in one rack unit (1 RU).

**Application**

Allows system designers to tailor configuration, reach and breakout construction to application requirements; to minimize waste, optimize cable management, speed deployment, and improve flexibility and manageability for lower installation costs.
