Reduce costs with expertly-engineered wire harness assembly products and tools

With proven cost-containment approaches, technical support and global availability of products, Panduit® will work with you to reduce wire harness assembly time.

Manufacturing has never been more connected – or more complex. And as wiring infrastructures grow, so do your customers’ expectations.

Your challenge is to increase productivity, while exceeding your customers’ requirements, enabling you to grow profitably.

Panduit helps customers organize, connect and protect wires and cable – for optimum performance. With Panduit as a partner, you’ll have an entire team of professionals working for you – from technical and engineering specialists to local product support representatives.

Turn to Panduit as your partner in support of your wire harness manufacturing processes.

“Converting to Panduit terminals was a seamless transition. Panduit went the extra mile to deliver a high level of service, providing the added value our equipment manufacturers are looking for in a wire harness.”

Mike McAllister, Materials Manager, Timberline Manufacturing Company
Wire Harness Solutions:
We’re wired for the way you work.

When you harness the ingenuity of Panduit®, you tap into a 60-year legacy of leadership in wire management.

And we’ve never stopped improving, advancing or reinventing our products to reflect your daily business challenges.

**Be more competitive.** Automating process to increase speed keeps you a step ahead! Panduit wire harness solutions feature design, material and application innovations that add value to your product.

**Be more productive.** Maximize uptime, reduce costs and meet production deadlines with readily available products, and application tooling engineered for ease of assembly and maintenance.

**Be more profitable.** Panduit designs cost-effective solutions that meet your unique application needs, saving you time and driving cost out of your process.

**Be more prepared.** Flexibility is key to meeting your customers’ changing needs. Panduit stays abreast of the latest regulatory changes by participating in industry associations and regulatory bodies. By working with Panduit, you can be confident that you meet today’s requirements and are ready for tomorrow’s growth.

**Productivity = Profitability**

Panduit wire harness products are designed with productivity in mind, allowing for quick development and assembly.
Our engineering versatility. Your business advantage.

WIRE HARNESS SOLUTIONS, TOOLS AND PRODUCTS.

1. Cable Ties and Tools
A wide selection of industry approved styles, sizes, materials, and colors plus ergonomic hand tools that provide consistent tensioning results.

2. Cable Tie Mounts
Secure quickly and easily with a broad selection of styles for installation flexibility.

3. Wire Harness Fixtures
Spacing the wire bundle at a uniform distance and height from the harness board allows easy cable tie application using manual or automatic tooling.

4. Identification Solutions
Printers, media and software provide a fast and easy way to create labels in compliance with industry standards for product identification and quality.

visit www.panduit.com/OEM
4. Compression Connectors
A variety of imperial and metric connectors meet your application needs. Hand tools and power tools are designed to reduce labor time and cost.

5. Ferrules
Bare and covered ferrules for use in accordance with UL 486F and Canadian Electrical Code, CSA-C22.2 No. 291-14.

6. Abrasion Protection
Spiral wrap, heat shrink and grommet edging products insulate and protect wiring in demanding environments.

7. Terminals
Lightweight and durable for ease of use and long life. Terminal tools provide reliable crimps and easy installation to save time.

Minimize installed costs and boost profits with automatic cable tie installation systems.

Automatic Cable Tie Installation System

Harness builders turn to Panduit® automatic cable tie installation systems for an efficient, all-in-one process. You’ll streamline cable tie installation, increasing productivity.

Reel-fed cable ties are fully encapsulated to ensure the ties are not damaged by fixtures or nails on the harness board to prevent downtime.

When assemblers use Panduit continuous, reel-fed cable ties, they spend less time changing reels—and more time building harnesses.

:: Reduce reel-change downtime with the Panduit continuous, reel-fed cable ties

6X faster than conventional cable tie installation systems

Less than 1 second Wrap, tension and cut cable ties in less than 1 second

visit www.panduit.com/OEM
Faster set-ups. Less downtime and rework.

Automated Termination System

In less than one second, the Automated Termination System speeds the process of indexing and crimping connectors. Result: consistent quality terminations with less need for reworking. Continuously molded carrier strip guarantees alignment in applicator, assuring proper location consistency.

Choose from a wide selection of molded disconnects, splices, rings, forks, pins, and ferrules on reels that work with our automated tools.

Fast and easy die changeovers save time

Measure your productivity gains:

6X FASTER than manual termination.
Panduit® supports all of your wire harnessing needs

Manual and Pneumatic Cable Tie Installation Tools
- Lightweight, ergonomic tools that are easy to use and reduce operator fatigue
- Tool controlled tension that provides flush cut-off and speeds installation

Automated Cable Tie System
The Panduit PAT 4.0 Automatic Cable Tie Installation System drives wire harness productivity through:
- Industry-leading cycle times
- User-friendly, icon-based LCD touch screen that simplifies operation and troubleshooting
- Lightweight, ergonomic tool heads reduce fatigue while maximizing maneuverability

Automated Termination System
The Panduit Reel Smart™ System includes continuously molded reel and strip ferrules and tooling options, which combine to:
- Speed the process of indexing and crimping connectors
- Ensure consistent quality terminations
- Minimize installed cost and boost profits

Harness Board System and Fixtures
The Quick-Build™ System is a modular way to build harness boards using reusable grid tiles and mounting pegs that allow:
- Fast routing and forming of wires in harness fabrication speed wire assembly
- Elevation of wires off the harness board at a uniform height to support easy application of cable ties

Labeling and Identification Solutions
Panduit labels, desktop and hand-held printers, and Easy-Mark™ Plus Labeling Software help ensure:
- Proper wire harness identification
- Improved quality assurance
- Compliance with industry standards
