

Using SmartZone Reports

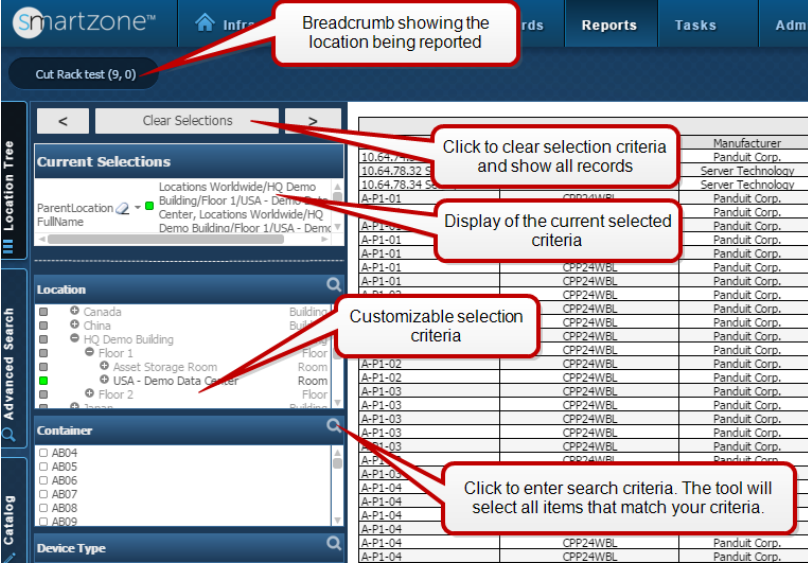

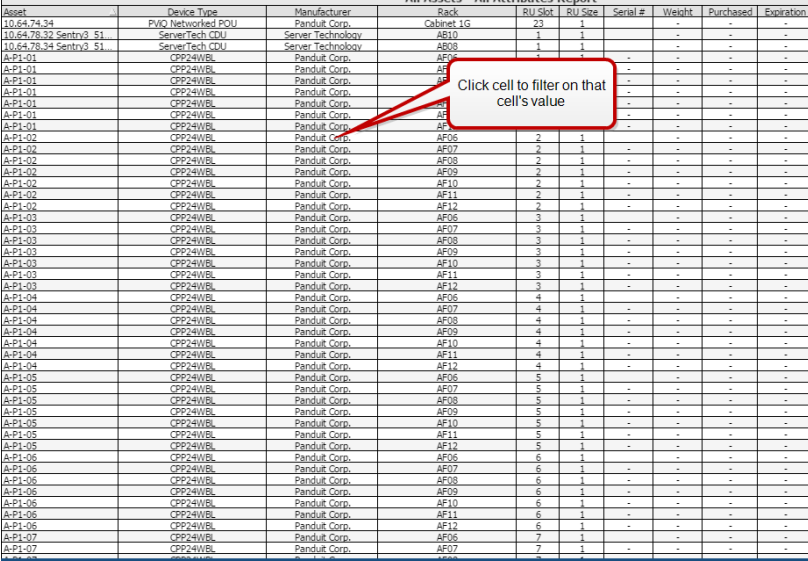

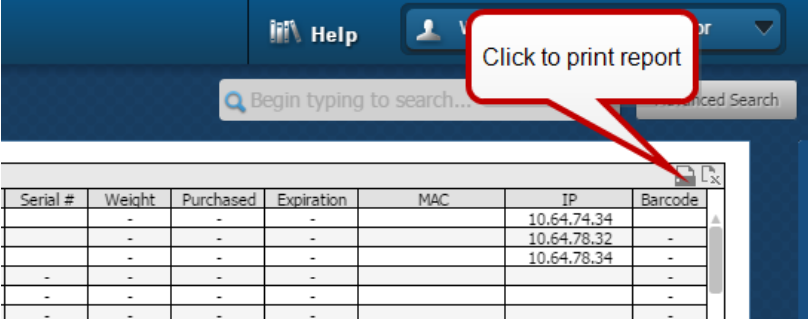

Applies to:	SmartZone Users
Objective:	Select, view, print, and export SmartZone DCIM Reports.
Documentation Reference:	SmartZone User Manual – SmartZone Reports – Using Reports
Pre-Requisites:	SmartZone Reports installed and configured on a (preferably) separate server.

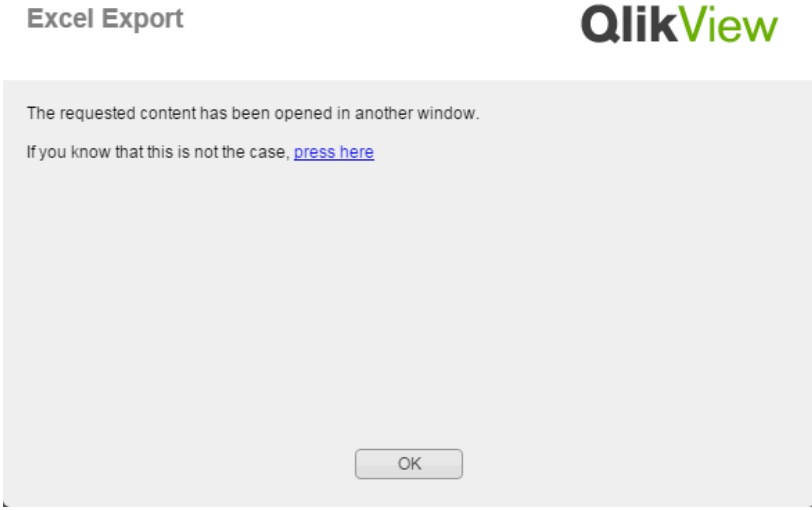

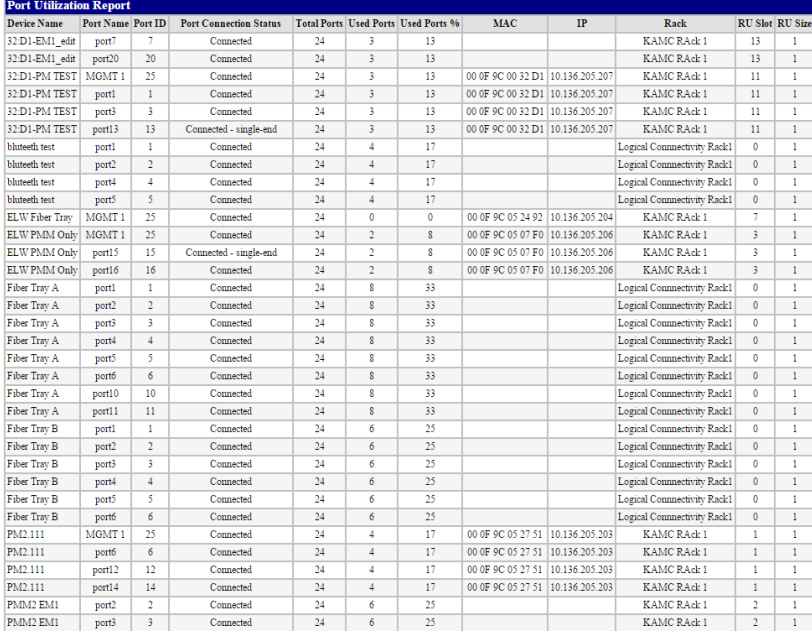

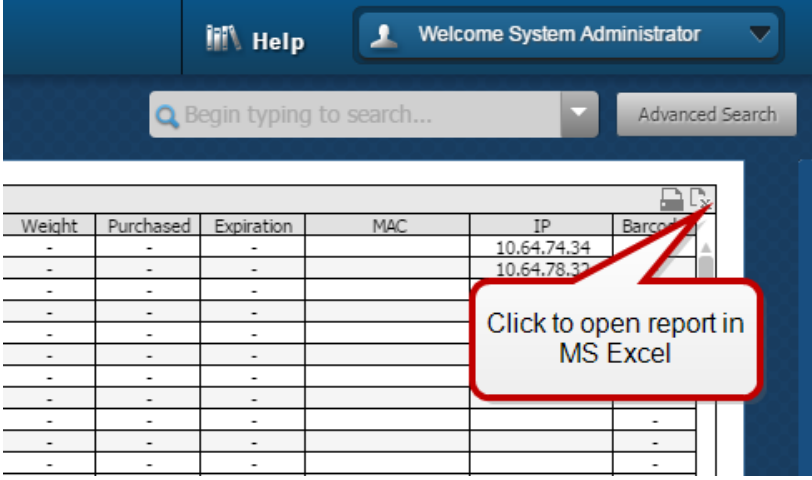

Description

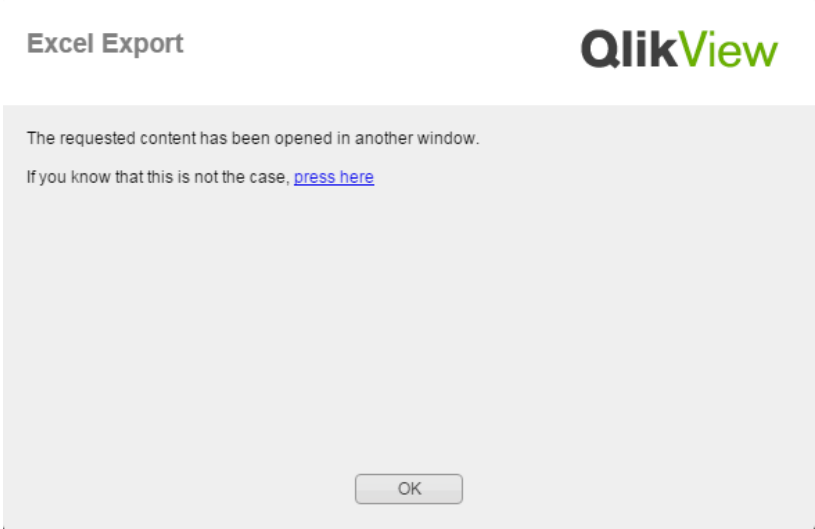

This procedure allows you to select, view, print, and export SmartZone DCIM Reports.

Performing the Procedure

Step	Instruction	Graphic	Result
1	In SmartZone, click the Reports module tab.	 <p>The screenshot shows the SmartZone navigation menu with the 'Reports' tab highlighted. The menu includes options like Power Capacity, Cooling Usage & Capacity, Environmental Performance, Energy Performance, Power Profile, Power Ranking, Power Chain View, UPS Capacity, LPS Usage, Cost Analysis, and Executive Summary.</p>	The list of all SmartZone reports displays.
2	Select a report.	 <p>The screenshot shows a detailed 'Port Utilization Report' table with columns for Device Name, Port Name, Port ID, Port Description, Status, Speed, and Utilization. The table lists various network ports and their current usage percentages.</p>	The report displays.

Step	Instruction	Graphic	Result																																																																																																																																																																																																																																																																																																																																																																																																																																																																																						
3	<p>At the Selection Criteria in the left pane of the window, select report criteria based on location, containers, device types, time period, and connection status. (The License Area option is available only for the Cabinet Capacity Report.)</p>		<p>The report data displays only for the criteria you have selected.</p>																																																																																																																																																																																																																																																																																																																																																																																																																																																																																						
4	<p>In the Report Display pane, you can further filter the results by clicking on a cell in the data table. The table will display only records that have that cell's value in the column.</p>	 <table border="1" data-bbox="479 934 1282 1491"> <thead> <tr> <th>Asset</th> <th>Device Type</th>
