

Wire Basket Overhead Cable Tray Routing System

Maximize Space and Increase Network Performance in your Data Center

PANDUIT®

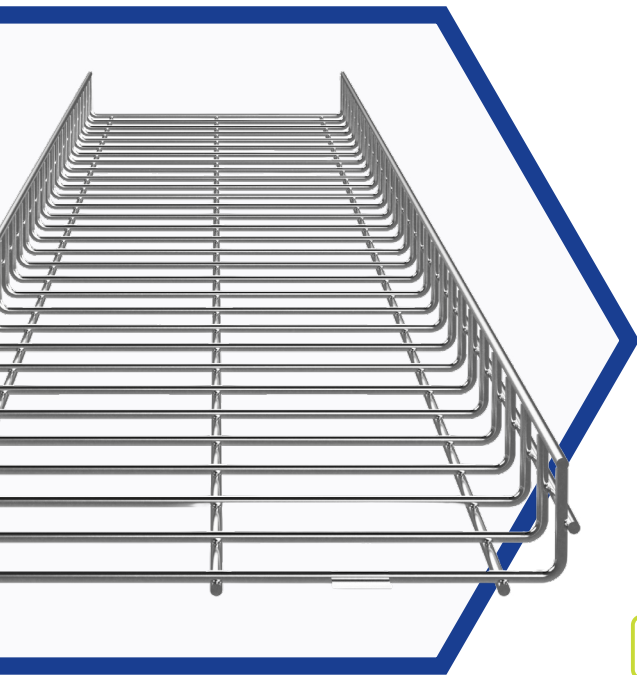

Versatility

Can be installed in any enterprise, data center or telecom room

Designed Better

Welded steel mesh wire basket provides superior strength-to-weight performance, delivering higher load capacity and 28% better safe working loads

Colorful Options

Available in three colors – black, white and electro zinc – to suit your data center needs

Splice It Up

Bolt-on, push-on, and expansion splices are used to join the sections of pathway together and create an electrically continuous connection

Adaptability

Available in eight standard widths and the basket's system includes multiple styles of mounting brackets to adapt to various support and building structures

Lighter and Larger

The basket is up to 20 percent lighter than other brands and has larger openings resulting in less cutting when completing applications such as sweeps by up to 50 percent*

Sustainability

Recycled steel construction reduces environmental impact while delivering the strength and durability required for demanding data center, enterprise, and industrial applications

Safety

Designed for safer handling and easier overhead installation, the lightweight basket is UL Classified for equipment grounding conductor use**
