

Add New Cabinet (New Type)

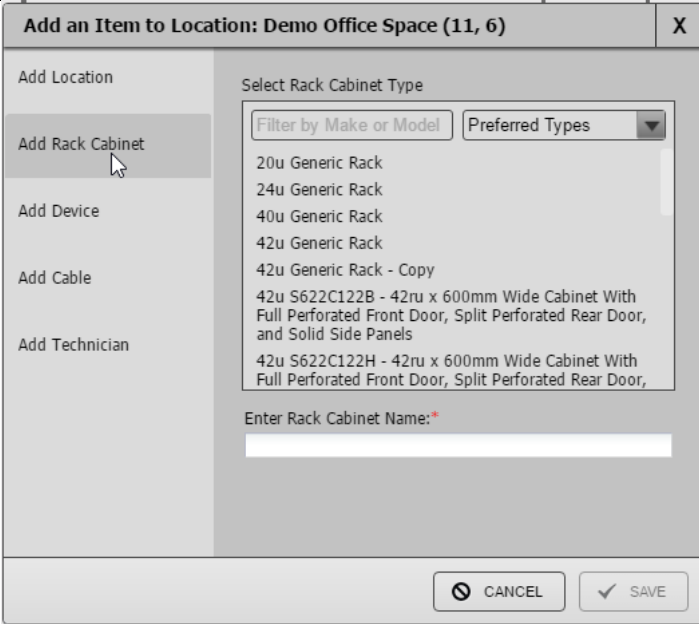

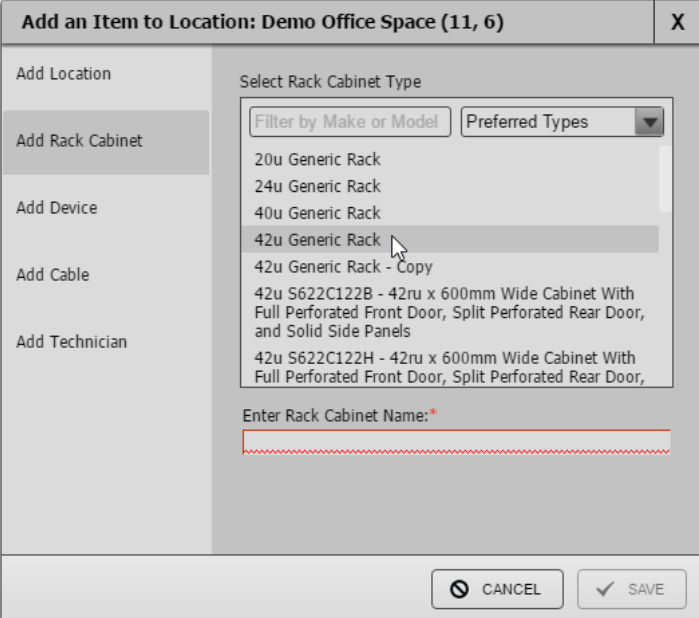

Applies to:	SmartZone Users
Objective:	Add a new cabinet to the SmartZone Location Tree where the cabinet type does not exist in the Location Tree
Documentation Reference:	SmartZone DCIM User Manual: <ul style="list-style-type: none"> • Floor Plan – Using Floor Plan • Location Tree – Add a Rack or Cabinet
Pre-Requisites:	A new cabinet that is not in the SmartZone database and is a type that does not exist in the Location Tree

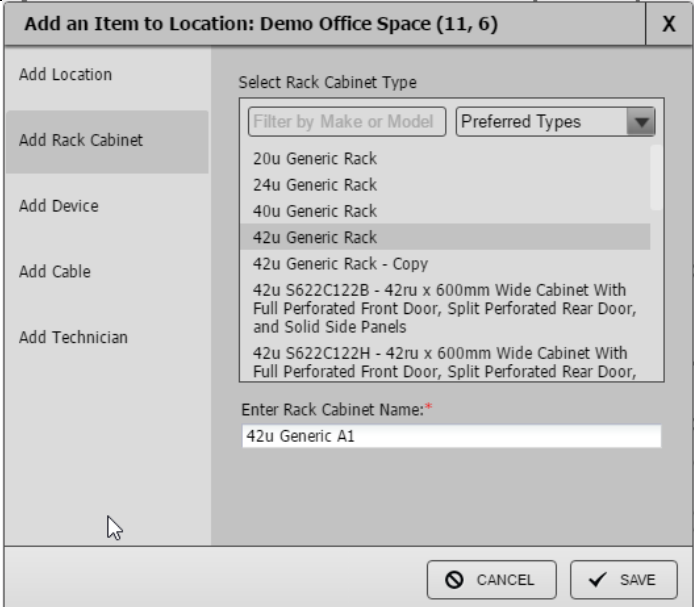

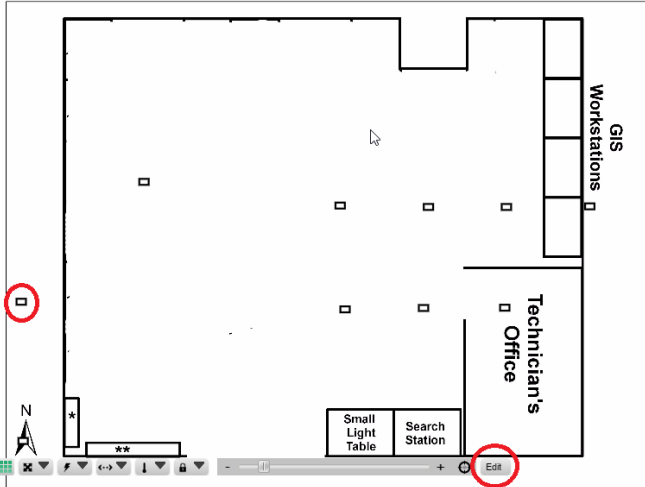

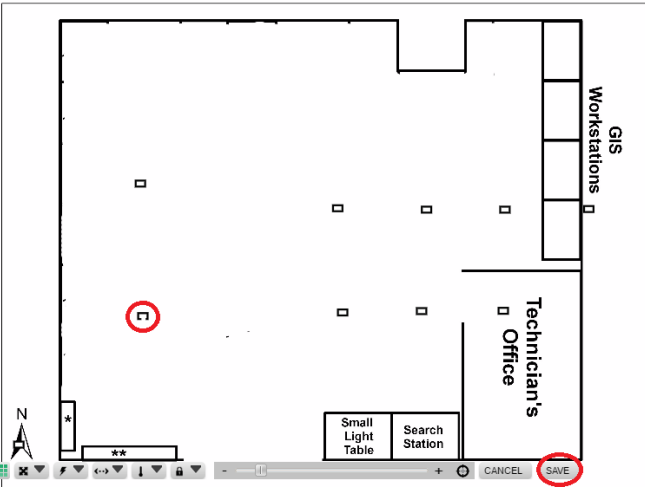

Description

This procedure allows the SmartZone DCIM user to add a new cabinet to the location tree when the cabinet type does not exist in the Location Tree.

Performing the Procedure

Step	Instruction	Graphic	Result
1	Open the Location Tree and navigate to the room where you want to add the new cabinet. Right-click the room icon and select Add New .		The Add an Item to Location dialog box displays.

Step	Instruction	Graphic	Result
2	In the Add an Item to Location dialog box, click Add Rack Cabinet .		The list of Rack/Cabinet Types displays.
3	Search for the cabinet type and select it.		With the cabinet type selected, you may enter the name of the new cabinet.

Step	Instruction	Graphic	Result
4	Enter the name of the new cabinet and then click Save .		The new cabinet name is saved and the room's Floor Plan displays.
8	Click Edit under the Floor Plan.		This allows you to add the new cabinet to the room's Floor Plan. The new cabinet displays outside the Floor Plan.
9	Select and drag the new cabinet to its proper position on the Floor Plan. Then click Save .		The cabinet displays in its proper place on the room's Floor Plan.
