PANDUITTM infrastructure for a connected world

WORK INSTRUCTION

Door Access Violation				
Applies to:	SmartZone Administrators			
Objective:	Set up traps for door access violations			
Documentation Reference:	SmartZone DCIM User Manual – User Administration – Assign Event Notifications to Users			
Pre-Requisites:	 Monitored cabinet doors equipped with door sensors Admin privileges in SmartZone DCIM 			

Description

This procedure allows SmartZone administrators to set up cabinet door sensors to deliver traps to Network Operations Center (NOC) users for door access violations.

Performing the Procedure

To configure Door Access Traps on the Gateway via the Gateway web-based interface, perform the following steps.

Step	Instruction	Graphic	Result
1	Click the Admin tab and then select User Admin- istration		The list of system users displays, along with User Details and Event Notifications for each user.

2	Select the desired user and then click the Event Notification tab on the right.	Add Mater Congr Absocial. Endl Advers Multer Magerg Technician Map. 	End of Steps		

[NOTE: STEP 3 IS A GUESS AS TO WHERE THIS ALARM WOULD BE IF IT EXISTED. I DON'T SEE ANY ALARMS RELATING TO DOOR ACCESS IN THE LIST.]

End State

Door Sensor traps are enabled and are sent to the desired NOC users, who can then investigate and resolve the traps.
